Note on the Disposal of Batteries and Waste Electrical and Electronic Equipment.

In connection with the distribution or delivery of devices that contain batteries, we are obliged to inform you of the following: batteries must not be disposed of with household waste. As an end user, you are legally required to return used batteries; you may do so free of charge at our dispatch warehouse, at any retail outlet that stocks them, or at municipal collection points. The black bar beneath the crossed-out wheeled-bin symbol indicates that the battery must not be disposed of in household waste. Where batteries contain more than 0.002% cadmium (Cd), more than 0.004% lead (Pb) or more than 0.0005% mercury (Hg), these hazardous substances are additionally marked by the symbols “Cd”, “Pb” or “Hg”. Waste electrical and electronic equipment (WEEE) must likewise not be disposed of via household waste. You may return WEEE free of charge at municipal collection points, recycling centres or to retailers (for example, where you purchase new devices). Before returning your device, please remove any detachable batteries or accumulators and dispose of them separately as described above. The crossed-out wheeled-bin symbol also applies to electronic waste to indicate separate collection.
